PROFESSIONAL SUMMARY

.NET Developer with hands-on experience designing and delivering CRM, ERP (School Management), and enterprise mobile applications for the education and workforce management sectors. Proficient in C#, ASP.NET Web Forms, SQL Server, Web APIs, and end-to-end payment gateway integrations including NTT, GrayQuest, and CCAvenue. Proven ability to enhance system performance, architect secure API solutions, and deliver scalable enterprise applications serving thousands of users. Passionate about writing clean, maintainable code and building impactful, user-centric software products.

PROFESSIONAL EXPERIENCE

MR Softwares

June 2025 – Present

[.NET Developer](#) | Ujjain, India

eSchoolApp — ERP Solution

- Developed and enhanced fee management modules, including a fee concession maker-checker approval workflow for Admin and Non-Admin roles, significantly improving financial transparency and operational control.
- Built and maintained core school management modules — Fee Management, Timetable, Attendance, and Report Card — introducing feature enhancements that improved day-to-day platform usability.
- Integrated and maintained multiple payment gateway solutions — NTT, GrayQuest, and CCAvenue — ensuring secure, accurate, and uninterrupted transaction processing across all payment channels.
- Successfully implemented the GrayQuest Auto Debit feature end-to-end, covering workflow analysis, architecture understanding, API integration, comprehensive testing, and production deployment support.
- Identified and resolved bugs across multiple application modules, ensuring smooth performance and a measurable reduction in user-reported incidents.
- Developed monthly analytical reports to support data-driven management decision-making and enhanced operational visibility.

Shramdoot App — Employee Management System

- Engineered staff shift management, attendance tracking, and payroll processing modules within a scalable, multi-branch workforce management platform.
- Migrated legacy ASMX web services to secure, token-based REST APIs, improving system maintainability, security posture, and inter-service communication reliability.
- Developed branch creation, shift assignment, salary tracking, and leave management features, streamlining HR operations across multiple branches.
- Designed and implemented role-based access control modules, ensuring strict data security and that users access only features relevant to their permissions.
- Built a consolidated Branch Details dashboard displaying total employee count, branch information, and key operational metrics in a single actionable view.

CRM — Ticket Management System

- Developed a Ticket Management module supporting ticket creation, priority-based assignment, and real-time status tracking, improving customer support response times and team accountability.

Nehvij Technologies

Jan 2025 – May 2025

[Web Development Intern](#) | Indore, India

- Built and maintained web applications using ASP.NET technologies, gaining comprehensive full-stack development experience across front-end UI and back-end business logic layers.
- Wrote optimised SQL queries for efficient data retrieval, storage, and manipulation across relational database systems, improving query performance and data accuracy.
- Designed and implemented normalised database schemas using SQL Server, establishing reliable, scalable, and maintainable data management architectures.

TECHNICAL SKILLS

- **Programming Languages:** C#, JavaScript, HTML, CSS, SQL / MySQL, Bootstrap
- **Frameworks & Tools:** ASP.NET Web Forms, .NET Framework, Visual Studio, Postman, Android Studio
- **Databases:** MySQL, SQL Server, Microsoft Access
- **API & Architecture:** RESTful Web APIs, ASMX Web Services, Token-Based Authentication, Web API Development
- **Payment Gateways Integration:** NTT, GrayQuest, CCAvenue
- **Version Control:** Git
- **Domain & Other:** ERP Development, CRM Systems, School Management Systems, Tally with GST, Application Maintenance

PROJECTS

Employee Feedback System | *ASP.NET · C# · SQL Server*

- Designed and developed a responsive Employee Feedback System with role-based login for Admin and Employee users, enabling structured, transparent performance review workflows.
- Integrated QR code-based feedback collection and interactive dashboards providing real-time performance analytics and cross-device tracking for management insights.

News Website | *ASP.NET · C# · SQL Server*

- Built a full-featured news portal with secure user authentication, enabling authors to publish, manage, and categorise articles with a streamlined editorial workflow.
- Implemented database-driven features for article storage, retrieval, tagging, and user profile management to support a scalable and maintainable content pipeline.

My Store — Desktop Billing Application | *ASP.NET · C# · SQL Server*

- Developed a desktop-based retail billing application featuring invoice generation, product catalogue management, and full transaction history tracking for store operations.
- Optimised UI/UX design for improved ease of use, billing accuracy, and operational efficiency, tailored for high-volume retail environments.

E-Book Rental Platform | *ASP.NET · C# · SQL Server*

- Built an e-commerce-style platform enabling users to rent e-books with online reading and download capabilities, expanding digital content accessibility.
- Designed an intuitive user interface and implemented SQL-backed data management for inventory control, user records, and complete rental lifecycle tracking.

EDUCATION

Master of Computer Applications (MCA)

[Shri Vaishnav Vidhyapeeth Vishwavidyalaya](#)

Indore, India

July 2023 – June 2025

Bachelor of Commerce + Computer Application (B.Com + CA)

[Rajiv Gandhi PG Government College](#)

Mandsaur, India

April 2020 – March 2023

Diploma in Computer Application (DCA)

[Makhanlal Chaturvedi National University](#)

April 2020 – March 2021
